

HOSPITAL MANAGEMENT

6 Months Program

3 Months E-Learning
3 Months Internship

AVODHA
Education for a Job

What is Hospital Management

Hospital Management is the process where healthcare providers effectively and efficiently administer everything from patient registration to appointment scheduling, document management, consultation management, lab management, drug safety, report generation, staff management, outpatient management, and so much more.

Tutor Details

Mrs. Hiba K P has 4 years of experience working in the Hospital Industry as an Admin, it's often forgotten that Hospitals are huge businesses that require efficient management just like any other business. The nature of hospitals and the sensitive nature of the business functions is also why hospital management as a course needed to be taught by someone who has experience working in the industry. She has taken all measures to gather the relevant information in the industry and project it in a plain and simple fashion for the benefit of all students. The course is built for professionals since Hiba herself happened to join the industry as a matter of sheer coincidence as is common for these types of jobs. nevertheless for those looking to deliberately join this field the options are limitless and the field is stacked with vacancies. The course curriculum covers all relevant aspects of every green field.

Hiba K P
